

## HEATPROOF

Heat reduction elastomeric coating

HEATPROOF 980

No. TD : H-002  
Revision : 02  
Effective Date : 11/01/2023

### PRODUCT DESCRIPTION

**HEATPROOF 980** is heat reducing elastomeric coating composed of acrylic emulsion polymers. It is used as a heat insulating and waterproof coating on building roof and exterior wall because the high solar reflectance of the membrane serves as a heat reflective surface and reduces temperature up to 15°C ingress keeping the interior of the building cooler. It helps in reducing power consumption substantially by reducing the load on airconditioners and keeps the interiors cool with additional function of waterproofing.

### FIELDS OF APPLICATION

Metal roof, primed metal surfaces, zinc, galvanized  
Concrete, asbestos, fiber cement, roof tile  
Side wall and exterior wall

### ADVANTAGES

1. Reduce surface temperature up to 15°C
2. Reduce room temperature up to 7°C
3. Water based and environmentally friendly
4. Elastic and Waterproof
5. Good corrosion resistant
6. Good adhesion
7. Covering hairline cracks

### TECHNICAL DATA

Type	:	Acrylic polymer dispersion
Color	:	As shown in colour card
Finish look	:	Dof
Total solar reflectance	:	
> White	:	> 80 %
• Cream	:	> 70 %
• Grey	:	> 45 %
Solid by volume	:	55 - 60%
Density	:	0.85 – 0.95 gr/cc
Drying time	:	
> Surface dry	:	60 minutes (30°C)
• Hard dry	:	2 - 4 hours (30°C)
Packaging	:	1 lt, 4 lt, 20 lt
Thinner/ clean up	:	Clean water
Thinning ratio by weight	:	First coat for priming : 10 % Subsequent coats : ready to use

Recommended Material consumption	:	0.5 - 1 lt/m <sup>2</sup>
Recommended DFT	:	300 - 600 microns
Recommended coating layer	:	Minimum 3 coats
Re-coating interval	:	Minimum 2 hours (30°C) or when the first coat already dry
Application method	:	Brush, roll, airless spray
Storage Stability	:	Storage in cool and dry condition in original unopened packaging. Protect from dampness and direct sunlight

## TEST PERFORMANCE DATA

Adhesion to substrate	:	> 1.5 N/mm <sup>2</sup>	ASTM D-4541
Tensile strength	:	> 1 N/mm <sup>2</sup>	ASTM D-412
Elongation	:	> 250 %	ASTM D-412

## DISCLAIMER

This document contains information issued based on the best and latest of Propan's knowledge in accordance to laboratory testing and practical application experience. The end user must test the product's suitability for their specific application and purpose. Propan shall not be liable for defects where the application of the Product has not been made fully in accordance with the recommendations and requirements.
